## QUALITY AND PRODUCT SAFETY POLICY

We as CMC;

- Produce high quality, hygienic and reliable products that will fully meet the demands and expectations of our customers in the field of cotton base personal care and health products
- Fulfill the requirements of our total quality management system which is an important element of being a leading organization in our field of activity and ensure product quality and product safety at the highest level sustainably with an understanding of continuous improvement
- Take preventive measures by analyzing potential risks that may threaten product safety in all processes from incoming raw material acceptance to finished products' sales and establish product safety culture at every level of our company
- Ensure and perpetuate our products' compliance with customer demands and expectations, national and international quality and product safety standards and legal legislation, by protecting customer satisfaction as well as ownership
- While carrying out our activities, we reduce emissions, increase efficiency, protect water and natural resources, minimize waste and innovate with the spirit of environmental awareness and sustainability
- Carry out production with modern equipment and installations by closely following technological developments
- Ensure that the motivation of our employees is kept at the highest level by prioritizing occupational health and safety by supporting their professional and social development and quality awareness with continuous improvement programs and activities

The mentioned items have been adopted as quality and product safety policy of CMC Turkey.
